SUMMARY

Aspiring DevOps and Cloud Engineer with hands-on project experience in AWS, Terraform, Docker, Kubernetes, GitHub Actions, and Linux. A highly motivated and growth-oriented individual with a strong passion for DevOps, cloud computing, and automation. Eager to continuously learn, develop practical expertise, and contribute to modern cloud-native environments.

EXPERIENCE

DevOps Engineer 07/2025 – 08/2025
D4 Insight Pvt. Ltd. Chennai, Tamilnadu

- Assisted in the deployment and basic maintenance of applications by supporting routine deployment tasks and ensuring applications were running as expected in different environments.
- Gained hands-on exposure to cloud and DevOps tools while working in a team environment, observing workflows and understanding how cloud-based deployments are managed in real projects.
- Supported deployment workflows under the guidance of senior team members, following instructions and learning standard practices used for application delivery.
- Participated in code reviews, team meetings, and SDLC activities to understand project requirements, development stages, and collaboration processes within the team.

EDUCATION

Bachelor of Technology (B.Tech) Information Technology 07/2022 – 07/2026
Mohamed Sathak Engineering College, Anna University Ramanathapuram, India
B.TECH 'IT' GRADUATED

SKILLS

- AWS
- Docker
- Kubernetes
- Terraform
- Ansible
- Linux
- Git
- GitHub and GitLab
- Bash and Python
- Trivy

PROJECTS

---------- **Secure AWS 3-Tier Infrastructure with Terraform** ----------
AWS | Terraform | VPC | EC2 | ALB | RDS | IAM | Nginx

- Designed and deployed **A Secure 3-tier AWS infrastructure** using modular Terraform, with public and private subnet segmentation.
- Configured **Application Load Balancer, private EC2, RDS MySQL, NAT Gateway, Security Groups, and IAM/SSM** for controlled and secure communication.
- Validated infrastructure through Terraform deployment, **ALB target health checks**, and live application access via the ALB DNS endpoint.

---------- **Automated Application Deployment Platform** ----------

AWS | CI/CD | Docker | Terraform | GitHub Actions | OIDC | SSM | Trivy

- Built an automated GitHub Actions CI/CD pipeline for testing, Docker image builds, Trivy security scanning, and deployment.
- Containerized frontend and backend applications with Docker and configured Docker networking.
- Implemented secure GitHub-to-AWS authentication using **OIDC** and deployed containers to **AWS EC2 via SSM**.
- Automated Docker image publishing and CI → CD execution after successful validation.
- Provisioned AWS infrastructure using Terraform and troubleshot real-world deployment and CI/CD failures.
